EXPLORE AUSTRALIA AS A LEADING DESTINATION FOR CRITICAL MINERALS & STRATEGIC MATERIALS, SUPPLY CHAIN SECURITY AND DIVERSIFICATION, PROCESSING, INVESTMENT AND TECHNOLOGY OPPORTUNITIES MAKING ENERGY TRANSITION POSSIBLE

Critical Minerals Australia Conference and Exhibition is Australia longest running international critical minerals, commodities, investment, clean energy & technologies show, bringing together the entire mineral resources value chain to Perth, WA.

Global energy transition to deliver clean energy future depends heavily on critical minerals, the security of the supply chain, and will decrease the dependence on fossil fuels in favour of **lower-carbon, hydrogen, renewable and nuclear energy sources**. Critical minerals are **crucial for high-tech technologies** such as **semiconductors, batteries and electric vehicles**. Australia is well placed to seize those opportunities thanks to its **rich geological reserves, expertise at extracting minerals and track record of a reliable producer and exporter of energy and resources**.

We are discussing all aspects of **mining exploration opportunities, investment strategies, financing options, development of new critical technologies, security of sustainable supply chains, First Nations & community engagement, ESG, processing, recycling and batteries**. For the first time, we are covering **silver** that is essential for green energy transition and has been identified as a priority metal in NSW.

Position your company at the forefront of the mining & critical minerals industry, alongside **25+ exhibitors** and **meet with 300+ key decision makers, qualified buyers and industry professionals who are actively seeking projects, products, technologies and solutions that will accelerate the mining momentum in Australia, and beyond**.

Critical Minerals Australia is held in **Perth, WA** to connect global investors, mining companies, government representatives, investment funds, banks, industry associations, service companies and equipment producers via **personalised networking platforms, 1-2-1 meetings and social events**.

WHAT YOU NEED TO KNOW ABOUT RARE EARTH ELEMENTS (REES)

What are Rare Earth Elements (REEs)?

They provide significant value to a nation's national security, energy independence, environmental future, and economic growth. Critical REEs are those deemed as supply risk and crucial towards clean energy technologies.

How many REEs are there?

There are 17 REEs as found in the periodic table.

Key Usages

1 DEFENCE
Satellite Communications
Aircraft Structures

2 METAL ALLOYS
NiMH Batteries
Fuel Cells

3 CERAMICS
Capacitors
Refractories

4 CATALYSTS
Petroleum Refining
Fuel Additives

Major Global Producers

China remains the world's top producer of rare earth elements, accounting for 69% of global production in 2023. USA is the second largest producer with 12% and Myanmar third with 11%.
